

Gentlemen,

It has come to my attention that the National Association of Broadcasters is trying to urge the FCC to curtail some of XM Radio's broadcasting content. I frequently travel cross country and have found that not only is XM Radio very welcome company, I have also found that the weather and traffic information it provides very up to dat & useful. I simply call up the city I am coming to or am already in and find the traffic and weather reports on the spot without have to wait for "Traffic on the 8's" etc.

As a citizen I would ask that you reject the NAB's (read BIG BUSINESS's) petition 04-160.

Should you have any questions please feel free to contact me.

Respectfully,

Richard Ford
